

DEFENSE LOGISTICS AGENCY

THE NATION'S COMBAT LOGISTICS SUPPORT AGENCY

RPPOB (Replenishment Parts Purchase Or Borrow) Program

Mr. Stephen Kelly
May 29-30, 2019

WARFIGHTER FIRST

DEFENSE LOGISTICS AGENCY

THE NATION'S COMBAT LOGISTICS SUPPORT AGENCY

RPPOB Program

- Bailment Program
- Mandated by law, implemented by DoD 4140.01 Volume 9
- Allows a domestic business to purchase or borrow replenishment parts
- Primary goals
 - Enhance competition through development of an alternate source
 - Reduce taxpayer costs and improve lead time
- Stipulations
 - Reverse engineering to be conducted at supplier's expense
 - Some items not eligible to be borrowed

RPPOB Program Steps

- You request item(s) via electronic request
- To help you with your business decision we inform you of:
 - Demand information
 - Your cost to purchase the item(s)
 - Any available data
- You determine if you wish to proceed
 - **Military Service concurrence is required prior to Sales or Loans**
- We forward you a contract for the purchase of the item(s)

RPPOB Program Steps (cont.)

- You return the signed contract and payment for the item(s)
- We ship the item(s) to you and you conduct the reverse engineering at your own expense
- You prepare a Source Approval Request (SAR) per http://everyspec.com/USN/NAVAIR/download.php?spec=JACG_SA_M_HB_16MAR2011.042733.pdf and submit it to us
- We forward your SAR to the appropriate Military Service for review/approval
- Example SAR:
 - <http://www.dla.mil/Portals/104/Documents/LandAndMaritime/V/VE/SARTemplate.pdf>

Virtual Parts Catalog & Display

- Essentially the same contents
 - Tour opportunity
- Consists of multiple items to be reversed engineered
 - Typically sole source items with a minimum of \$40,000 annual demand
 - Small subset of DLA Aviation items
- Encouraging competition on these items will reduce acquisition costs
- Changes in process to include additional items

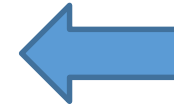

Virtual Parts Catalog & Display (cont.)

- Interface with potential suppliers
 - Opportunity to discuss resident items
 - How to view the DLA Internet Bid Board System (DIBBS) and other computer systems that will assist in identifying annual demand and other potentially helpful indicators
- For additional information visit our Virtual Parts Catalog via the RPPOB page at:
 - <http://www.dla.mil/Aviation/Offers/Services/AviationEngineering/Engineering/RPPOB.aspx>

RPPOB —

Replenishment Parts Purchase or Borrow

DoD Instruction 4140.57 allows contractors to buy or borrow part-numbered items to reverse engineer at their own expense. Contractors interested in the Reverse Engineering Program can submit their request on our [Reverse Engineering Form](#).

For [repeat customers](#) seeking to access the RPPOB Reverse Engineering Form directly, you may want to note that you can reach the RPPOB Request form directly from the Top Navigation by clicking the following tabular path:

[Doing Business With DLA > Customer Support > Replenishment Parts Purchase or Borrow - RPPOB](#)

The contractor will physically examine the item; produce drawings and specifications through technical analysis performed during the reverse engineering process, and provide same for review. The contractor and the Government agree when the borrowed part will be returned or a Source Approval Request (SAR) package will be provided to the Government.

Domestic business concerns may purchase, borrow, or view replenishment parts for the following purposes:

- Design replication, product improvement or modification, and alternate sourcing through product identification or reverse engineering practices;

Domestic business concerns may purchase, borrow, or view replenishment parts for the following purposes:

- Design replication, product improvement or modification, and alternate sourcing through product identification or reverse engineering practices;
- Development of data packages required to obtain approval to sell like parts to the government; and,
- Enhancement of competition with resultant cost reduction by obtaining alternative sources of supply and manufacturing.

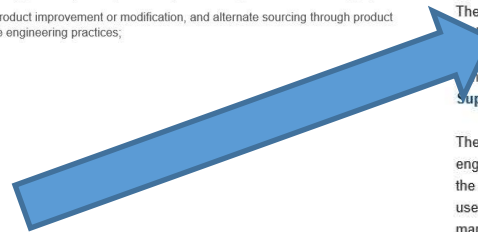

The items in the [Parts Catalog](#) that have a minimum of \$40,000 annual demand are on public display at DLA Aviation in Alexandria, VA. Breakdowns of each sole source item are shown in the [Parts Catalog Spreadsheet](#). Display room staff can assist contractors how to view the DLA Internet Bid Board System (DIBBS) and other computer systems that allow them to see annual demand and other helpful information. Please see our [RPPOB Aviation Industrial Supply Day Conference - Display Supplier Brief](#).

The following general guidelines are provided to assist in developing a data package. Additional information on reverse engineering is contained in MIL-HDBK-115, U.S. Army Reverse Engineering Handbook. For Reverse Engineering, also see the new DoD Contractor's Guide to Value Engineering and the associated [Advanced Engineering Data Guidance](#). This is used in conjunction with the [Aviation SAM \(Source Approval and Management\) Handbook](#). Federal Stock Classes (FSCs) managed by DLA Aviation: These can be determined by visiting [Federal Supply Class Assignments](#) or [Federal Supply Group / Federal Supply Class Search](#). For questions concerning our Replenishment Parts Purchase Or Borrow Program eMail us at dscr.boc@dla.mil, call 804.279.3550, or FAX 804.279.4966.

Note: The RPPOB Program generally provides for both Sales and Loans of parts. However, electronic parts, ball/roller bearings, seals and rubber products may NOT be loaned out. In order for a contractor to purchase or borrow a part they must be registered in AMPS. Use the following link to register: [AMPS Registration Approval Process](#). To become a new supply source, see the fact sheet [Steps-to-Follow](#).

DO NOT Request a SALE or LOAN when Highlighted in RED. Drawings are permissible.

Includes Long Term Contracts (LTCs) highlighted in 'Yellow' that allow Supplier to make an informed decision.

Red Text Lines are HIDDEN, they represent No Stock On Hand, Unfilled Orders, NO Annual Demand Quantity (ADQ) or a combination of each.

Total Annual Dollars \$47,670,374.83

Total Annual Quantity 80,189
